

Samuel Mitiku Eshetu

Full-Stack Developer & AI Engineer — React · Node.js · Python · Machine Learning

Addis Ababa, Ethiopia · samuelmitiku393@gmail.com · +251 912 181 590 · github.com/samuelmitiku393 · linkedin.com/in/samuel-m-eshetu-475b98237

Career goal: Self-employment · Availability: Immediately

PROFESSIONAL SUMMARY

Information Systems graduate and Intelligent Data & AI Engineering trainee with practical experience in full-stack web development, machine learning, data analysis, and AI-driven application development. Experienced in building practical software solutions, digital products, and data-driven applications through academic, professional, and independent projects. Seeking opportunities to apply AI, software engineering, and problem-solving skills to build scalable technology solutions and grow toward AI engineering and technology entrepreneurship.

EDUCATION

B.Sc. in Information Systems

Graduated July 2025

Haramaya University

TRAINING

Intelligent Data & AI Engineering

30 May 2026 — 24 Sep 2026

Qiyas

Key competencies:

Python for data analysis & ML

Data preprocessing, cleaning, exploration, visualization

Supervised & unsupervised learning

Regression & classification

Model evaluation & performance analysis

Time-series forecasting & feature engineering

NLP & text classification

Model deployment & application integration

Jupyter, pandas, NumPy, scikit-learn

WORK EXPERIENCE

Freelance Growth Engineer

Jul 2025 — Present

4-3-3 Sport in Ethiopia

- Develop and maintain digital products and web-based tools supporting the organization's sports media and audience-growth operations.
- Manage and optimize Telegram-based digital platforms, content distribution, and audience engagement initiatives.
- Build Telegram Mini Apps and supporting web applications to improve user interaction and digital services.
- Combine software development, automation, analytics, and growth strategies to expand digital reach and improve platform functionality.

Full Stack Web Developer

Jul 2024 — Sep 2024

INSA

- Developed a Learning Management System (LMS) to support online learning and academic management workflows.
- Built responsive frontend interfaces and backend functionality using modern web development technologies.
- Implemented role-based functionality for students, teachers, and administrators.
- Worked across frontend, backend, database, and API components to deliver an integrated web application.

TECHNICAL & PRACTICAL SKILLS

Programming: Python, JavaScript, SQL

AI & Machine Learning: scikit-learn, regression, classification, clustering, NLP, time-series forecasting, model evaluation

Data: pandas, NumPy, data preprocessing, exploratory data analysis, data visualization

AI/ML Development: Jupyter Notebook, model training, feature engineering, model serialization and deployment

Frontend: React, Redux Toolkit, Tailwind CSS, Vite, responsive UI development

Backend: Node.js, Express.js, FastAPI, REST APIs

Databases: PostgreSQL, MongoDB

Tools & Platforms: Git, GitHub, Docker, Telegram Bot API, Telegram Mini Apps

ModelForge — Machine Learning Model Development Platform

Experiment with, evaluate, and serve regression and classification models

- Developed a machine learning platform for experimenting with and evaluating multiple regression and classification algorithms.
- Implemented data preprocessing, feature engineering, model training, performance comparison, and model serialization.
- Worked examples: house-price prediction (regression) and SMS spam classification (NLP) in Jupyter notebooks.
- Trained scikit-learn pipelines are served for real-time and batched predictions through a FastAPI backend behind JWT authentication with admin, developer, and viewer roles.

Python

scikit-learn

FastAPI

pandas

Jupyter

PostgreSQL

Docker

Turumba — Telegram Mini App for Advertising Operations

Manage advertisements across multiple Telegram channels

- Developed a full-stack Telegram Mini App that enables marketing teams to manage advertisements across multiple Telegram channels.
- Implemented advertisement creation, editing, scheduling, conflict detection, role-based team collaboration, and automated Telegram notifications.
- Added revenue and channel-performance analytics plus monthly and annual Excel report generation delivered to admin DMs.
- Built as an npm monorepo with React, Vite, Node.js, Express, Prisma, PostgreSQL, and the Telegram Bot API.

React

Vite

Node.js

Express

Prisma

PostgreSQL

Telegram Bot API

Learning Management System — INSA Internship

Integrated academic management MVP for students, teachers, and administrators

- A full-stack Learning Management System designed to support interactions between students, teachers, and administrators.
- Worked on frontend interfaces, backend services, database integration, and role-based functionality to create an integrated academic management MVP.

JavaScript

REST APIs

SQL

Role-based access

Merkeb ERP Mini App

ERP access inside Telegram with verified identities

- Verified Telegram initData server-side with HMAC-SHA256 before returning any ERP data.
- Mapped Telegram identities to ERP accounts and bound the UI to Telegram theme variables.

React

Express

Telegram WebApp SDK

HMAC-SHA256

4-3-3 Sport Ethiopia

Sports news portal with a Redux Toolkit data layer

- Built the frontend with RTK Query for normalized fetching, caching, and invalidation.
- Mobile-first reading experience tuned for a match-day traffic profile.

React

Redux Toolkit

Vite

REST APIs

CERTIFICATIONS / ADDITIONAL TRAINING

- ALX Ventures Founders Academy Program — ALX Ethiopia, Jul 2024
- English Access Micro-Scholarship Completion — U.S. Department of State, Oct 2019

LANGUAGES

- Amharic — Native
- English — Professional working proficiency
- Afaan Oromoo — Intermediate
